

## Crompton Instruments DRM-125-1P - Summary Sheet

### Summary

The DRM-125-1P is an MID approved, three module wide, DIN Rail mountable, single phase electricity meter manufactured by Crompton Instruments in Italy. This 125 Amp single phase meter sets itself apart from the competition by including as standard, import and export Energy (kWh) readings on two tariffs.

In addition it records Active Power (kW), (import & export), both Capacitive and Inductive Reactive Power (kVAh & kVAR), (import & export), and Current (I) which makes it a more complete unit than many other single phase DIN Rail meters.

The meter comes with two pulsed outputs which are proportional to the kWh and kVAh measurements. Additional comms are available through a one module wide comms module, these are read through an IR port available on the meter. Comms options are: M-Bus (DRM-M); Modbus-RTU RS485 (DRM-MOD); SD card data logger (DRM-LOG) and a power supply transformer for data loggers (DRM-LOG-PS).

N.B. This meter can be fitted into a DIN Rail enclosure. [Click here](#) to see our full range of Enclosures.

### Product Code

SPDCR125P

### Meter Type

Single Phase

### Fitting Type

DIN Rail

### Max Current (Amps)

125

### MID Approved

Yes

### Smart

No

### Input Type

Direct Connect

### Output Type

Pulse

### Tariffs

Dual

### Import / Export

Import & Export

### Module Width

3

### Availability

5 Day

### Condition

New

### Brand

Crompton Instruments

### Country of Manufacture

Italy

### Dimensions

### Wiring Diagram
