

## OWL Micro+ Three Phase Energy Monitor with Large Sensors

### Summary

The OWL Micro+ allows monitoring of live consumption for the property and gives access to historical and average readings for up to the past three months.

It supports block and economy7 tariffs, as well as flat-rate and installation & setup is simple and doesn't require an electrician.

The unit displays greenhouse gas impact, date and time as well as energy usage and cost and multiple alarm functions are available to instantly identify when you're exceeding a customisable target.

Large sensors support cables up to 17mm in diameter with a maximum 200A load. There is a standard sensor version available for smaller electrical supplies (up to 72A and 10mm diameter cables).

A single phase version of this Energy Monitor is also available.
