

OWL + USB Single Phase Energy Monitor

Summary

The OWL + USB allows monitoring of live consumption for a property, as well as access to historical and average readings for up to two years using the In-Home Display.

The unit displays greenhouse gas impact, date and time as well as energy usage and cost. It supports block and economy7 tariffs, as well as flat-rate. Installation & setup is simple and doesn't require an electrician.

The In-Home Display features a USB connection, allowing 30 days of data to be downloaded on to a USB stick and transferred on to any Windows PC or laptop. Dedicated software can be downloaded from OWL's website allowing you to view data in a graphical format.

A three phase version of this Energy Monitor is also available with either large sensors, (up to 200A and 17mm diameter cables), or standard sensors, (up to 72A and 10mm diameter cables).
