

Europa Steel Meter Enclosure Summary Sheet

Our range of steel enclosures from Europa can be used to mount either panel mounted or wall mounted meters as well as housing other electrical equipment inside. There are over 40 sizes available, but we've listed our most popular sizes below. Can't see the size you need? You can download the manufacturer's datasheet from our website to view the full range or simply get in touch with our friendly sales team who will be happy to help.

The range offers IP66 protection as standard and all enclosures are supplied with a galvanised back plate and earth studs. They have an epoxy powder coated finish and feature top & bottom gland plates.

S P Wales can pre-install your metering equipment, including mounting CT meters on to the front of the enclosure with all required CT links, voltage reference and earthing terminals behind. This can be for a single meter or up to 32 individual meters on our largest enclosure. We've also pre-wired summation CT's, test blocks and current transformers into our enclosures. We're happy to help, whatever the requirement.

Specification

Enclosure Material	Steel								
IP Rating	66								
Suitable For	Panel Mount & Wall Mount Meters								
Part Code	ENEU30 3015	ENEU30 3020	ENEU40 3015	ENEU40 4015	ENEU40 4020	ENEU50 4020	ENEU60 4020	ENEU80 4030	ENEU10 06030
