

Steel Meter Enclosure Summary Sheet

Our steel enclosures have been selected to be the ideal size to mount either a panel mounted or surface mounted meter. They're ideal for CT operated meters as the required fuses, CT links etc, can be fitted within the enclosure, with the meter display still visible while the meter door is closed.

The smaller enclosure already has a 90x90mm cut-out on the front, perfect for a standard panel mount meter. Both have a tough powder coated grey finish, galvanised wall mounting brackets and removable back plate.

Stephen P Wales supply a wide range of single phase and three phase DIN Rail meters. We can also pre-wire any CT operated meter into your enclosure, allowing for a simple, hassle free installation upon delivery.

Specification
