

Acrel ADL400 Metering Kit in Metal Enclosure - Summary Sheet

Our three phase DIN rail metering kit is built for fast and easy installation and is ideal for retrofit applications. The compact enclosure has cable entry points on the top, bottom, sides and back and our meter engineers pre-fit the required CT links, voltage reference and earthing with clear labelling.

This kit is supplied with the Acrel ADL400. This CT operated DIN Rail meter is for use with three phase supplies and measures electrical parameters including Current (I), Voltage (V), Power (kW/KVA/KVAR), Power Factor (PF), Frequency (Hz), Imported, Exported and Total Energy (kWh/kVARh).

It's MID approved, allowing it to be used for billing applications and is highly accurate, (Class C, $\pm 0.5\%$). With both a Pulse Output and RS485 Modbus RTU it can be integrated with BMS or remote monitoring systems.

We recommend installing this kit with our split core CT's that simply clip around the supplies, saving time and disruption. You can select CT's appropriate for your circuit with 24mm & 36mm apertures available covering loads of 100A to 400A.

Can't find a meter or CT to suit your requirements, contact our friendly sales teams who will be happy to put together a bespoke quotation.

What's included?

- 1 x Acrel ADL400
- 1 x Metal 8 Module Enclosure
- CT links, voltage reference and earthing terminals
- 1m of 1.5mm stranded blue, brown, black & grey cable
- 1m of 2.5mm stranded earth cable

A set of 3 CT's is required in addition to this kit and the meter will be programmed to match the appropriate ratio prior to dispatch.

Product Code	MKDAC40M
Power Supply	Three Phase
MID Approved	Yes
Smart	No
Output Type	Pulse / Modbus
Tariffs	Single
Import / Export	Import & Export
Availability	Next Day
