

Ampy Prepayment Card Meter – Summary Sheet

The Ampy is our best-selling prepayment card meter, providing great value for money. This 100 Amp, non-MID meter is easy to install and can be set up with two tariffs if requested, perfect for Economy 7. Building owners can purchase payment cards, which are sold to the end consumers to top up their meter, allowing payment to be received in advance of energy consumption. We also supply a programming card allowing the cost per unit to be changed, as well as configuring emergency credit, standing charge and debt collection. The meter is available in 4 codes, (A, B, C & D), to ensure security. All our reconditioned meters go through an initial inspection from one of our experienced meter engineers. The meter is then reset and zeroed, followed by a thorough clean, re-spray and second test to ensure accuracy and product quality.

Dimensions

Width	120.0mm
Height	170.0mm
Depth	90.0mm

Wiring Guide

Specification

Part Code	PP3S
Meter Type	Single Phase
Fitting Type	Wall Mounted
Max. Current (Amps)	100A
