

TIM60 Coin / Token Meter - Summary Sheet

Summary

The TIM60 Coin / Token Meter is our newest timer, specifically designed for controlling devices with larger loads such as electric showers. Time can be set from one second to 99 hours and 59 minutes and the 60 Amp max. load supports devices drawing up to 14 kW.

A pre-start function allows a count down before the connected device operates and a pre-end function allows an audible warning to be given before the end of the allotted time period. A credit save feature allows customers to pause the connected device, with an optional 'start/stop' fascia available and a resettable coin counter shows how much should be in the coin box upon emptying. This timer can be configured to accept £1 & 20p's, 1's or L2 & L4 tokens, simply select your requirement upon ordering.

Your logo and contact details can be included on the front cover of the timer. If required, select the optional extra and email us a copy of your logo to sales@spwales.com.

While easy to program on site, we can pre-program your meter for you prior to dispatch. Just select the optional extra and enter your requirements upon placing your order, or feel free to call our friendly sales team who will be more than happy to help.

Timer Comparison Chart

| Timer | Payment Type | Max Current | Override | Start / Stop | Pre-set Tariff | Pre-Start | Pre-End | Run-On | Peak / OffPeak | Width (mm) | Height (mm) | Depth (mm) |
|-----------|--|-------------|----------|--------------|----------------|-----------|---------|--------|----------------|------------|-------------|------------|
| TIM30 | £1 & 20p, L2 or L4 Tokens, €1 | 30 Amps | ✓ | ✓ | ✗ | ✗ | ✗ | ✗ | ✗ | 183 | 270 | 93 |
| TIM60 | £1 & 20p, L2 or L4 Tokens, €1 | 60 Amps | ✓ | ✓ | ✓ | ✓ | ✓ | ✗ | ✗ | 183 | 270 | 93 |
| TIM3100 | £1 & 20p, L2 or L4 Tokens, €1 | 13 Amps | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✗ | 183 | 270 | 93 |
| TIM3200 | One or two session cards. | 13 Amps | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✗ | 183 | 270 | 93 |
