

Carlo Gavazzi - EM21-72D.AV5.3.X.OX.X - Summary Sheet

Summary

The EM21 is a 5 Amp, CT operated, three-phase energy meter. This meter is unique in that it can be installed either as a DIN Rail or 72x72mm Panel Mounted meter, making it flexible for installers.

It measures a wealth of parameters including Active Energy (kWh) and Reactive Energy (kVAh), Line to Line and Line to Neutral Voltages (V), Current (I), Power Factor (PF) and Frequency (Hz). It also measures Active Power (W), Reactive Power (Var) and Apparent Power (kVAh) both for each phase and cumulatively.

This model comes with a single programmable pulse output as standard which can be programmed to produce a pulse anywhere between 0.01 and 9.99 kWh. The pulse length options are 30ms, 100ms or 120ms.

This meter is suitable for 3Ph balanced and unbalanced loads as well as single and 2 phase supplies.

N.B. This meter can be pre-wired into a DIN-Rail or Panel Mounted enclosure. [Click here](#) to see our full range of Enclosures, or [click here](#) to find out more about our Pre-Wiring Service.

Product Code

TPDCGEM210X

Meter Type

Three Phase

Fitting Type

DIN Rail & Panel Mounted

Max Current (Amps)

5

MID Approved

No

Smart

No

Input Type

Current Transformer

Output Type

Pulse

Tariffs

Single

Import / Export

Import Only

Module Width

4

Availability

Next Day

Condition

New

Brand

Carlo Gavazzi

Country of Manufacture

Italy

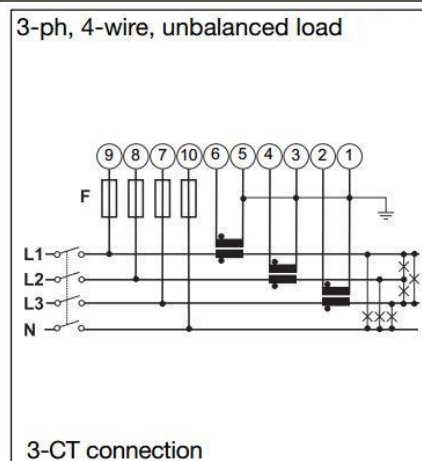

Measured Parameters
